Summary

Product-focused Full-Stack Engineer and Certified ScrumMaster® with 8+ years of experience driving end-to-end product development across UX, engineering, and delivery.

Proven ability to translate business goals into product strategies, define roadmaps, and collaborate with cross-functional teams to ship scalable solutions. Experienced in stakeholder management, sprint planning, backlog prioritization, and delivering user-centric products in agile environments.

Combines technical depth, design thinking, and product intuition to drive impactful product decisions and deliver measurable outcomes.

Experience

Invizid

Remote

Senior Software Engineer

July 30, 2024- current

- Owned end-to-end product lifecycle from problem discovery to feature delivery, ensuring alignment between user needs and business objectives
- Collaborated with stakeholders to define product requirements, prioritize features, and shape the product roadmap
- Led sprint planning, backlog grooming, and delivery tracking to ensure consistent and predictable releases
- Translated ambiguous requirements into structured product solutions, balancing scope, timelines, and technical feasibility
- Designed user flows and wireframes in Figma, ensuring seamless handoff between product thinking and engineering execution
- Built and deployed scalable applications using Next.js and Vercel, reducing turnaround time by eliminating cross-team dependencies
- Continuously improved product experience through iterative feedback loops and usability enhancements

Salesforce

Bangalore, India

Senior Technical Consultant

Jan 2020 - August - 2023

- Partnered with product managers, designers, and engineering teams to deliver large-scale Telecom and Commerce Cloud solutions
- Translated business requirements into product features through user research, journey mapping, and requirement analysis
- Facilitated stakeholder discussions and workshops to align on product vision, scope, and priorities
- Contributed to roadmap execution by breaking down features into actionable tasks and managing sprint deliverables
- Influenced product decisions by evaluating trade-offs between user experience, business needs, and technical constraints
- Led development of scalable front-end solutions using Lightning Web Components and Angular
